Further, globalization could mean that new technologies which are adopted to enable free flow of communication for international trade and commerce also impact most human experience, customs, languages, and cultures.

Finally, it may be said that while globalization has its benefits, it might also cause certain conflicts to intensify and indigenous cultures to flounder.

Globalization facilitates and services across free movement of goods and services across the globe besides contributing towards diffusion of ideas, cultures and values among the people of the world.

This means that there is greater interdependence among countries that may eventually lead to a relatively homogeneous world.

In other words, the opening up of economics by nation states could result in better inter-relations among them.

The use of mobile phones have severe financial implications for young people. For example, Smith (2014, p. 38) argue that about 20 per cent of teenagers has been drive to bankruptcy because they does not understand the debt accumulation for phone services. In addition, if a mobile phone is lost or stolen, a further debt may be incur as the contract to pay for the phone still have to be serviced. A further concern is the early age at which mobile phone

use begins, with a recent study of adolescent phone use revealing that the average age for under 18s to begin using mobile phones are 13, and many teenagers are spending more than half their incomes on bills (Dasey, 2015, p. 1) It is therefore vital that secondary schools runs programs to educate year 7 children on the costs associated with mobile phone use and the ongoing obligations to service contract payments for phones no longer in their possession.
